

HONKA LOOK BOOK

Residential houses & holiday homes

HEALTHY HOUSES

Inspired by Nordic Nature

We are passionate about good living. We build high-quality log houses for more organic, healthy and ecological living. Our log homes are crafted from the finest Finnish pine, with years of knowledge and experience.

HEALTHY & ORGANIC LIVING

**Our goal is to build
houses that make
people happy.**

- ✓ Good indoor air quality
 - ✓ Good night sleep
- ✓ Stress-reducing massive wood
 - ✓ Aesthetic and functional
 - ✓ Acoustically pleasant
 - ✓ 100 % renewable
- ✓ Naturally energy-efficient

www.levispirit.fi

RESORT

HONKA SAARI. *A holiday hideout in the Finnish Archipelago. See Honka Saari Collection.*

HONKA KIDE

A Scandinavian style sauna in the Archipelago of Western Finland. See Honka Kide collection.

A photograph of a snowy forest path. The path is covered in snow and has several sets of dark, parallel tracks, likely from a vehicle or sled. Long, dark shadows of trees and the tracks stretch across the snow from the right side, indicating a low sun position. The trees are tall, thin, and covered in snow. The overall scene is peaceful and wintry.

NORDIC QUALITY

HONKARAKENNE – A GLOBAL PIONEER IN HEALTHY AND ECOLOGICAL LIVING

Founded by five brothers Saarelainen in 1958, Honkarakenne, with its trademark Honka, is the first industrial log home manufacturer in the world.

We have built almost 85,000 houses around the world and come up with countless innovations that have changed log construction to its core. We will continue this way.

Marko Saarelainen, CEO

“Our extensive experience with handling wood has made us experts in healthy, ecological and safe construction.”

DESIGNED AND MANUFACTURED WITH YEARS OF EXPERIENCE

Honka has an experience of supplying nearly 85 000 houses in 50 countries. All Honka houses are manufactured on our own mill in Finland, Karstula. The high level of automation helps ensure that the woodwork behind every Honka house is dimensionally accurate. It also makes the on-site installation and building processes quick and easy.

The new laminated log production line was launched in 2014 in Karstula, Finland.

FINNISH PINE

A NATURAL CHOICE

Because Finnish pine grows slowly, its wood is exceptionally dense and hard, particularly the heartwood.

The raw material used for Honka log houses comes from PEFC-certified Finnish forests where more wood grows than is harvested.

- ✓ Organic & natural
- ✓ Dense & strong
- ✓ 100 % renewable

THANK YOU.

**Nature isn't just beautiful. Even in small doses,
it changes the way we feel.**
